SUMMARY

Full-stack developer and designer with 6+ years building and shipping web products end to end - frontend, backend, and the infrastructure they run on. Built and launched two live SaaS products solo, one at \$2k+ MRR, and worked on a fintech gaming platform serving 100k+ monthly users. Comfortable owning a product from design through deployment, with a focus on AI-integrated features.

SKILLS

Languages: TypeScript, JavaScript (Node.js), Python, SQL, Swift, PHP

Frontend: React, Next.js, Vue/Nuxt, Three.js, Tailwind, Redux, Zustand

Backend & Data: Nest.js, Fastify, Express, Prisma, TypeORM, Socket.io, Flask, Laravel, PostgreSQL, MySQL, MongoDB

Infra & Tools: Docker, Nginx, Ubuntu, AWS, GitHub Actions, CI/CD, Figma, Photoshop, Stripe, REST/GraphQL, JWT, AI/LLM integration

PROFESSIONAL EXPERIENCE

Independent

Mar 2020 - Present

Full-Stack Developer & Designer

- TechScreen (techscreen.app) — Built and run a SaaS for interview assistance solo: 10,000+ users, \$2k+ MRR, and 100% uptime since its March 2025 launch. Handles Stripe billing, AI-powered features, a cross-platform Electron app, multiple web systems (website, docs, admin CRM), and a custom monitoring and alerting stack.
- Quolly (quolly.app) — Built the full technical product for a real-time assistant that helps sales reps live during calls; now in closed beta with 400+ reps. Built solo; an agency now runs acquisition.
- MRR Island (mrris.land) — Designed and built a 3D interactive city (Three.js) where each building maps a public startup's MRR and growth.
- Take on contract work fixing AI-generated ("vibe-coded") codebases - refactoring, stabilizing, and shipping projects that had become unmaintainable.

Fintech Gaming Platform (NDA)

Mar 2023 - Jun 2026

Full-Stack Developer & Designer

- Built and designed several revenue-generating games and their backend systems for a fintech platform serving 100,000+ monthly users.
- Built an anti-fraud system that reliably detects and blocks 3,000+ abuse attempts per month.
- Designed and animated game interfaces, including 3D browser games built with Three.js.

CS2 CIS

Apr 2021 - Feb 2023

Full-Stack Developer & Automation Engineer

- Built the web platform and automation behind a 130,000+ member competitive Counter-Strike community.
- Built a tournament registration platform (React, Express, PostgreSQL) with solo and full-team signups and skill-based matchmaking — 200+ teams, 1,000+ players.
- Built an admin dashboard for 100+ administrators to track stats, log actions, and manage rewards.
- Built Discord automation for onboarding, verification, and ticketing that processed 8,000+ requests.

Web Studio DimaDim

Aug 2020 - Feb 2021

Web Developer

- Delivered ~30 client websites (React, Node.js, CMS) — landing pages, entertainment apps, and business sites.
- Improved client SEO by ~60% and load times by ~40% on average.
